Allowable Subject Matter

Claims 1 – 26 are allowed. The following is an examiner's statement of reasons for allowance: Applicant argued that the cited prior art references of Lewis and Feygin failed to teach or suggest a rotary annular build drum for receiving materials therein. Both references teach *a rotating stage or platform, on which materials are deposited*; however, neither teaches or suggests *a rotary annular build drum*. Therefore, prior art fails to teach, either alone or in combination, an apparatus for fabricating a three-dimensional object from a representation of the object stored in memory, the apparatus comprising: a rotary annular build drum for receiving successive layers of a build material therein; and an array of at least one printhead disposed above the annular build drum, wherein the at least one printhead is configured for selectively dispensing droplets of a liquid binder onto the build material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
